

# Cimbi

If you don't want your company's molinos to go to waste - Cimbi is the right choice for you!

What would you say if - instead of throwing out your company's molinos - you would give it to us so that we can give it a new life? We will create bags and accessories out of it which you can give to your employees or partners! Or even better - join us, and create your own within a teambuilding activity!

The most important thing for us is to bring sustainability to as many people as possible. This is the idea of awareness - which anyone can actively and easily apply and practice in everyday life and can be a representative of the topic.

Through molino recycling, we want to give companies - and thereby people - opportunities to see that waste has a price - so it can also have value. And in the process of creation, we can touch on many topics and develop our skills - either individually or in a group.
